Urban & Architectural Research Workshop

**Bauhaus Dessau**

**>>> new strategies for organic research**

The workshop will take place at

**Bauhaus Dessau**

**>>> Erasmus+**

## objective & description

The workshop **Bauhaus Dessau Archiscape** will connect with the concept of Organic Architecture & Design in order to develop new perspectives of interdisciplinary conceptual learning.

Through crisis, experience and scientific exploration we have learned that we need to maintain an organic relationship with nature if we want to cultivate a sustainable and humane society, a liveable environment and healthy cities.

The workshop will offer a platform for design collaboration and discourse to a group of 40 students who will be working in 5 international teams on new perspectives for the understanding of Organic Architecture and Landscape Urbanism in times of transformation.

The original Bauhaus Dessau was more probably a process of venture and experimentation, not an institution, as we may believe, rather a sphere of dynamism than of apodictic certainties, an organism instead of an object. Our **Bauhaus Investigation** will reveal paths of finding and retrieval, trying to connect with the hidden energies of the Bauhaus Idea.

**methods & outcome**

Lectures, panels, site visits and table work will be the main activities of participants investigating and identifying collaboratively the potentials of the Bauhaus “Archiscape”. Possible scenarios of architectural and urban interventions are to be defined, respective representations to be worked out and prepared for exhibition and final review. The result will be accredited with 3 ECTS (5 ECTS with additional elaboration).

**BIP\_virtual component 14.5.2024 - 26.5.2024**

Starting from 14.5.2024 the BIP will be initialized by a preparative stage of online meetings via Webex dedicated to the terms of reference and the assignment of specific tasks to be performed during the actual workshop in Dessau. A second stage of online-cooperation will be undertaken until 16.5.2023 concentrating on a finishing process with regard to the publication of the workshop results in academic media.
