

Architectures of care

THINKING THROUGH MAKING BLENDED INTENSIVE PROGRAMME

Architectures of Care 2 invites Master's students in Architecture, Urban Studies and related disciplines to take part in an international design-led programme focused on experimental and **community-engaged spatial practices**. Set in Rione Scala, a **peripheral neighbourhood of Pavia** and a former centre of **working-class social and political life**, the programme adopts a scenario-based methodology imagining the **resettlement of climate refugees** in 2050. Participants will explore *relational ecologies* and develop *experimental design strategies* through **interdisciplinary teamwork**, combining online seminars with a hands-on workshop in collaboration with local institutions and residents.

**Limited places available
APPLY BY FRIDAY 4TH JULY**

**ONLINE LECTURE SERIES
SEPTEMBER 2025**

**ON-SITE SUMMER SCHOOL
6TH - 10TH OCTOBER 2025
